Art Unit: 3673

The abstract must be amended to specify that the frame device can be adjusted laterally and longitudinally, as described and claimed, not only in "one direction"

A substitute specification including the claims is required pursuant to 37 CFR 1.125(a) because it contains many typing and, description, and grammatical errors.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and (c)

Figure 9 must be briefly described on page 7.

It is not clear which is the "lengthwise" direction specified on page 8 line 5 and the "length" in line 23 of page 8. Periods on page 8, lines 10, 22 and 25, and page 10, line 14 must be deleted.

Line 6 on page 10 is not understood.

What does "lineage means" mean?

On page 9, line 7, it appears that "Head" should be changed to -Foot-; and in line 8, "A child" should be changed to -Children-.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 14 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one

Art Unit: 3673

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. From lines 7,8 "greater than there times" appears to be ~~new~~<sup>new</sup> matter. AC

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what exactly are the various elements of the claims, and which is the length and the width of the frame.

In response to this action applicant is urged to identify each and every element of the claims with reference to the drawings, with numerals in parentheses. Such numerals will aid in more easily "following" the claims and will help in avoiding "mistakes" but will not in any way limit the scope of the claims.

What is "the intermediate support member of claim 1, line 6.

The last three lines of claim 9, and claims 10,11 are not understood. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3673

Claims 1-14, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Beckert, Kean et al, Furnivall et al or Stanley et al, teaching the use of adjustable bed frames.

In a brief conversation on 9/2/03, Mr. Castel indicated that in addition to submitting a substitute specification, in accordance with ~~US~~ practice, he will consider submitting a set of new claims, in accordance with U.S. practice.

*AC*

The prior art cited on PTO 1449, teaching the use of adjustable frames, is noted.
